REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistake or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, U. S. Army Troop Support and Aviation Materiel Readiness Command, ATTN: DRSTS-MTPS, 4300 Goodfellow Boulevard, St. Louis, MO 63120. A reply will be furnished directly to you.

Section II. Special Tools List (Not applicable)		
IV. NATIONAL STOCK NUMBER AND PART NUMBER INDEX	25	

1. **Scope.** This manual lists repair parts, special tools, test, measurement, and diagnostic equipment (MDE), and other support equipment required for operation and performance of organizational, direct support, general support and depot maintenance of the Air Conditioner.

General.

a. **Section II - Repair Parts List.** A list of repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of assembly groups in ascending numerical sequence, with the parts in each group listed in figure and item number sequence. Bulk materials are listed in NSN sequence, the last group in Section II.

b. **Section II - Special Tools List.** (Not applicable)

c. **Section IV - National Stock Number and Part Number Index.** A list, in NIIN (National Item Identification Number) sequence, of all National Stock Numbers appearing in the listings, followed by a list, in alphanumeric sequence, of part numbers appearing in the listings. National Stock Number and part numbers are cross-referenced to each illustration figure and item number appearance.

3. **Explanation of Columns.** The following provides an explanation of columns found in the tabular listings:

a. **Illustration.** This column is divided as follows:

(1) **Figure Number.** Indicates the figure number of the illustration in which the item is shown.

(2) **Item Number.** The number used to identify each item called out in the illustration.

b. **Source, Maintenance, and Recoverability Codes (SMR).**

(1) **Source Code.** Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul and items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

PB	Item procured and stocked for insurance purpose because essentiality dictates a minimum quantity be available in supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or fitting and stocked only for subsequent additional initial issues or outfittings, subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to special maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probability of discontinuance or shutdown of production facilities, would prove uneconomical to produce at a later time.
KD	An item of a depot overhaul/repair kit not purchased separately. Depot kit is defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit is defined as a kit that provides an item which can be replaced at organizational or intermediate levels of maintenance.
KB	It
MO	
MF	Item to be manufactured or fabricated at the depot maintenance level.
MH	Item to be manufactured or fabricated at the depot maintenance level.
MD	Item to be manufactured or fabricated at the depot maintenance level.
AO	Item to be assembled at organizational level.

AD	Item to be assembled at depot maintenance level.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB	Item is not procured or stocked. If not available through salvage, requisition.
XD	A support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA or XD.

(2) **Maintenance Code.** Maintenance codes are assigned to indicate the levels of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the fourth position will indicate one of the following levels of maintenance.

Code	Application/Explanation
C	Crew or operator maintenance performed within organizational maintenance.
O	Support item is removed, replaced, used at the organizational level.
I	Support item is removed, replaced, used by the direct support element of integrated direct support maintenance.
F	Support item is removed, replaced, used at the direct support level.
H	Support item is removed, replaced, used at the general support level.
O	Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). The fourth position will contain one of the following maintenance codes:

Code	Application/Explanation
O	The lowest maintenance level authorized to perform complete repair of the support item at the organizational level.
F	The lowest maintenance level authorized to perform complete repair of the support item at the direct support level.
H	The lowest maintenance level authorized to perform complete repair of the support item at the general support level.
D	The lowest maintenance level authorized to perform complete repair of the support item at the depot level.
L	Repair restricted to designated repair activity.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, cleaning, etc., at the user level. No special tools are procured for the repair of this item.

(3) **Recoverability Code.** Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability Codes	Definition
Z	Nonreparable item. Item is unserviceable, cannot be repaired, and is disposed at the level of Position 3.
O	Reparable item. Item is economically repaired, demurred, and disposed at the organizational level.

- F** Repairable item. When uneconomically repairable, condemn and dispose at the direct support level.
- H** Repairable item. When uneconomically repairable, condemn and dispose at the general support level.
- D** Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below level.
- L** Repairable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
- A** Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

National Stock Number. Indicates the National Stock Number assigned to the item and will be used for requisitioning purposes.

Part Number. Indicates the primary number assigned by the manufacturer which controls the design characteristics of the items.

NOTE

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5-digit numeric code listed in AS 3708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.

Description. Indicates the Federal item number and, if required, a minimum description to identify the item. Items that are included in kits or sets are listed below the name of the kit or set. The quantity of each item in the kit or set indicated in the quantity incorporated in unit column. The part to be used differs between serial numbers of the same model, the effective serial number, and the last line of the drawing.

When density of equipments supported exceeds density spread indicated in the basis of issue, the authorization is increased accordingly.

g. Unit of Measure (U/M). Indicates the standard of the basic quantity of the listed items used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the requirement of units of measure will be requisitioned.

h. Quantity Incorporated in Unit. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, (e.g. shims, spacers, etc.).

4. Special Information.

a. Repair parts kits and gasket sets appear in the last entries in the repair parts listing for each figure in which its parts are listed as repair parts. They are listed at the end of the repair parts listing for the last figure containing parts of the kit.

b. The following publications pertain to the conditioner and its components.

TM 5-5420-200-2	Operator Organization and Maintenance Manual
	Direct Support and General Support Maintenance Manual

5. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Unknown.

(1) First. Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Second. Find the illustration covering the assembly group to which the repair part belongs.

(3) Third. Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) Fourth. Using the Repair Parts Listing, find the figure and item number noted on the illustration.

cross-referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item number in the repair parts list.

TITLE
AIR CONDITIONER, 25,000 BTU
NSN 4120-01-030-6883

E EXACT. . . PIN-POINT WHERE IT IS				IN THIS SPACE TELL WHAT IS WRONG AND WHAT SHOULD BE DONE ABOUT IT:
PAGE NO.	PARA- GRAPH	FIGURE NO.	TABLE NO.	
6	2-1 a			In line 6 of paragraph 2-1a the manual states the engine has <u>6</u> cylinders. The engine on my set only has <u>4</u> cylinders. Change the manual to show <u>4</u> cylinders.
81		4-3		Callout 16 on figure 4-3 is pointing at a <u>bolt</u> . In the key to fig. 4-3, item 16 is called a <u>skim</u> . Please correct one or the other.
25	line 20			Ordered a gasket, item 19 on figure B-16 by NSN 2910-00-762-3001. I got a gasket but it doesn't fit. Supply says I got what I ordered, so the NSN is wrong. Please give me a good NSN.

1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155
 1 sq. decimeter = 100 sq. centimeters = 15.5
 1 sq. meter (centare) = 100 sq. decimeters = 1
 1 sq. dekameter (are) = 100 sq. meters = 1,076
 1 sq. hectometer (hectare) = 100 sq. dekameters
 1 sq. kilometer = 100 sq. hectometers = .386

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06
 1 cu. decimeter = 1000 cu. centimeters = 61.0
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. ft.

Approximate Conversion Factors

To change	To	Multiply by	To change	To
inches	centimeters	2.540	ounce-inches	newton-meters
